

```
public class LoginManager {  
    private static final String USERNAME = "admin";  
    private static final String PASSWORD = "admin123";  
  
    public boolean login(String username, String password) {  
        if (username.equals(USERNAME) && password.equals(PASSWORD)) {  
            // Proceed to the next screen  
            return true;  
        } else {  
            // Display error message  
            return false;  
        }  
    }  
}
```
